

# Make your own potato box

Make your own potato box! You can either cut out the box below or you could design your own (make sure it's square), then follow the instructions on page two or visit <https://youtu.be/qJ0y2PbljgA> to see an instructional video.

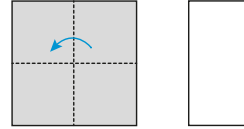

# Make your own potato box

- 1** With the picture side facing upwards, fold the square in half then open it back out.

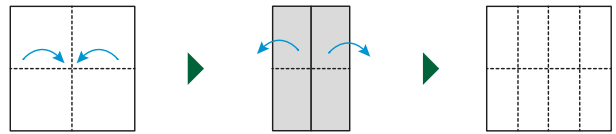

- 2** Turn 90° and repeat Step 1.

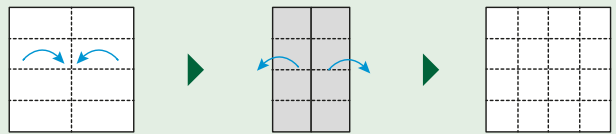

- 3** Flip it over so the blank side is upwards.

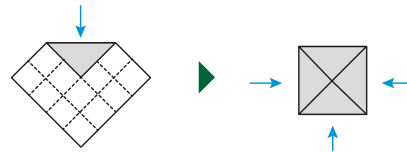

- 4** Fold two opposite sides in to meet at the centre line then open it back out.

- 5** Turn 90° and repeat Step 4.

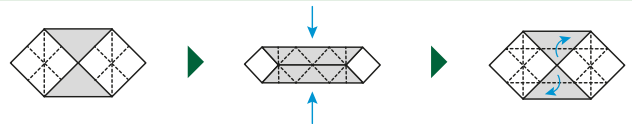

- 6** Fold all four corners to the centre point.

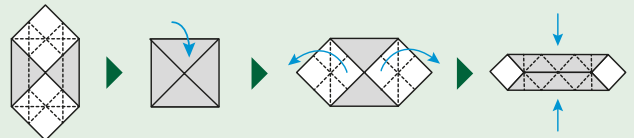

- 7** Open two opposite corners back out.

- 8** Fold each of the folded edges into the centre and open them back out.

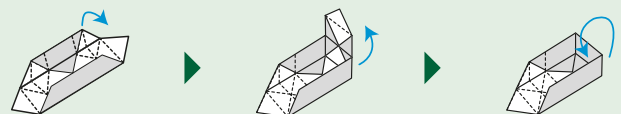

- 9** Turn 90° and refold the corners back into the centre to remake the square then repeat Step 7.

- 10** Lift the folded sides upwards to make two sides of the box.

- 11** Now this is the tricky bit!  
Fold the opposite sides upwards, bending in the corners along the 45° creases and fold the point inwards.

- 12** Turn 180° and repeat Step 11 and your box will be done.
